- Focus areas for 2021-22**
1. Re-evaluate your ransomware defenses, do a business impact analysis
  2. Reduce/consolidate security tools/technologies and vendors (less is more in many cases)
  3. Monitor Cloud mis-configurations in real time and at machine speed
  4. Adopt borderless network strategies (SASE, Zero Trust, and/or whatever you want to call it)
  5. Think about cooperative/collaborative SOC strategy
  6. Train staff on business, ML models, model training, service mesh, containers, DevSecOps
  7. Plan for government shutdown of a critical software or service provider due to security issues
